

ScandiNova

ScandiNova

ScandiNova Group – Premium power solutions, and beyond.

ScandiNova **empower organizations** to make new discoveries and drive progress in the fields of medical technology, scientific research, and various industries.

With a storied legacy of expertise of and innovation, ScandiNova Group is a global pioneer in sustainable power solutions for **MedTech, Industrial, and Science applications**.

We create high-voltage pulse modulators, RF systems, power & RF amplifiers, magnets, and related products – all using the latest technology for maximized quality and performance. Our technology drives scientific discovery, cancer therapy, MRI, weather radar, cargo inspection, and beyond.

Our reach **extends to 50+ countries**, serving esteemed clients like CERN, SLAC, Tsinghua University, KEK, Varian, IBA, ABB amongst others. The group includes ScandiNova Systems, Scanditronix Magnet, IEICO, and Microwave Amps.

With 200+ dedicated employees and 150+ years of collective expertise, ScandiNova Group is a trusted partner, guiding you into the undiscovered possibilities this technology holds.

# ScandiNova

ScandiNova is leading the charge in exploring the untapped potential of pulsed power technology, and is the parent company of the group. Our systems are used in life-saving radiotherapy equipment, science applications, cargo scanning solutions, and many other industrial applications.

With extensive experience and professional engineering expertise, our friends in Vislanda, Sweden excels in producing tailored magnets for accelerators and various applications. From medical and research to industrial uses, their precision design and manufacturing ensure optimal solutions.

Embodying Bristol's rich history of innovation, Microwave Amps stands at the forefront of amplifier design. For over 30 years Microwave Amps has manufactured solid-state amplifiers used in high energy physics, medtech, radar, and various industrial applications. Utilizing the very latest semiconductor technologies, class-leading performance has been provided to customers with specific requirements.

A ScandiNova Company

International Electric Company (IECO) delivers precision instruments and subsystems to the global healthcare, scientific, and industrial markets. From medical imaging to demanding industrial applications, IECO's robust design and precision solutions have earned worldwide recognition, representing Finnish innovation at its best.

The logo for ScandiNova, featuring the word "ScandiNova" in a white, sans-serif font. The letter "i" in "Scandi" has a blue dot, and the letter "N" in "Nova" is blue. The logo is centered within a dark blue background that features a large, stylized, glowing blue graphic element resembling a double-strand DNA helix or a complex circuit path.
